

## Questions to ask when quoting MECO Cantilever Rack

1. What type of product are you storing?
  - a. What are the dimensions? Length x Width/Depth x Height
  - b. What does each load weigh?
  - c. Is the load stored on a pallet? Will the load have any possible deflection between arms? See deflection test on page 22 of MECO OMAHA Buyers Guide.
  - d. What is the amount of products being stored?
2. How many loads will be stored per level? Will they double stack?
3. Do you want single-sided, double-sided or a combination?
4. What is the size of the area where the rack will be located (including height)?
